

Systematically designed HF motor spindles

A successful realization of your project is not only based on our technical know-how and highly specialized supplier network.

- Drives 0.1kW up to 50kW
- Drives with very high power density
- Eco-Drives with an attractive price-performance ratio
- Torque characteristics configurable
- Various tool interfaces
- Complete systems available from one supplier

How to find us:

Mechatron GmbH
Eulerweg 11
64291 Darmstadt
Germany

Perfection is our drive

CUSTOMIZED SPINDLES

Customized Solutions starting from 1pcs

In addition to our standard range of HF milling, grinding, engraving and drill spindles, we are specialized in customized, In-house designed and manufactured spindles and other electrical machines.

Are you looking for a motor which you cannot find on the market?

Tel: **+49 (0) 6151 49 244 70**
E-Mail: **info@mechatron-gmbh.de**

Application examples

- Very short drilling spindle as rotating tool in a machining center for large-scale production
- Spindle with special shaft, compact dimensions and very high power density for use in remote controlled robots for sewer renovation
- Drive motors for test bench application with customized mandrel
- Various spindles with tool change for machine tools with HSK, ISO, or direct shaft interface
